

# Anemia Profile

Test ID: 30577

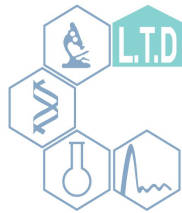

CPT: 83540 001 835585025, 85045

## Clinical Significance:

There are many types and causes of anemia, we have created this panel to look at the most frequent causes, such as iron deficiency, B12 deficiency, and the bone marrow's ability to produce red blood cells. Symptoms of anemia symptoms include fatigue, pale skin, weakness, shortness of breath, headache, dizziness, and cold hands and feet.

## Profile Components:

CBC, Reticulocyte Count, B12, Folate, Ferritin, Iron, TIBC, Transferrin.

# Labtech Diagnostics

### Container:

Serum Separator Tube (SST®) and Lavender-top (EDTA) tube

### Transport Temperature:

Room temperature

### Specimen:

Serum and whole blood

### Specimen Stability:

see Individual tests

### Reject Criteria:

see Individual tests

### Days Performed:

Mon-Fri

## Collection Instructions:

see Individual tests
